COMPANY PROFILE

BAAKTech Uganda Limited

Software engineering solutions · IT infrastructure · Commercial distribution

ABOUT US

BAAKTech Uganda Limited is a Ugandan technology and commercial solutions company, incorporated in 2016 and based in Kampala. We deliver custom software engineering, IT infrastructure, computer hardware supply and technical maintenance for businesses, non-governmental organisations and institutions.

Beyond software and network engineering, we support market entry, user onboarding, marketing and product distribution, and we develop our own digital platforms, including Farm2MarketUganda.com.

VISION

To be East Africa's most trusted partner for practical software engineering, resilient IT infrastructure and seamless technology-driven product adoption.

MISSION

To empower businesses, institutions and communities by delivering tailored software solutions, dependable hardware and networking systems, and end-to-end product distribution and after-sales support.

WHAT WE DO

- Custom software design and development: web, desktop and Android applications
- Software engineering contracts
- Network setup and IT infrastructure
- Computer hardware and software supply
- Database engineering and data management
- Product onboarding, marketing and distribution
- Installation, maintenance and after-sales support

OUR VALUES

Reliability · Practical innovation · Integrity · Client-centric execution

HOW WE DELIVER

A structured five-stage lifecycle: discovery and requirements, architecture and design, development and configuration, testing and quality assurance, then deployment, onboarding and staff training.
